N-ABLE™   adlumin™

Key Features of N-able Extended Detection and Response (XDR)

Command more visibility to your security, compliance, and cyber risk.

What's Included with N-able Extended Detection and Response(XDR)?

Illuminate Threats. Eliminate Risks. Command Authority.

What you can't see poses the greatest risk. Your exposures lurk amongst your employees and vendors, hybrid environments, cloud services, and the darknet. There are countless gaps where threats can hide before they lead to business disrupting events like ransomware shutdowns or massive data breaches.

N-able, in partnership with Adlumin, illuminates threats that would have otherwise gone unseen in the lead up to a massive attack. Our cloud-native platform leverages powerful machine learning to identify critical threats, automates remediation rules and system updates, and provides continuous compliance reporting.

Compliance Reporting

The regulatory landscapes are constantly shifting. With One-Touch Compliance Reporting, you can snapshot reports, framework verification, and executive reports to eliminate uncertainty and streamline your compliance efforts.

Darknet Monitoring

Far too many cyberattacks rely on stolen credentials for sales on a booming darknet economy. Identifying darknet compromise before your own data is used to exploit you can be the difference between a minor nuisance and a major incident. Darknet monitoring finds your confidential information before it falls into the wrong hands.

Honeypots

Building on a multi-layered security approach, this feature offers customers another way to detect threat actors already in their environment to quickly stop them before they access critical systems or data.

Prevent Privilege Abuse & Account Takeover

We use artificial intelligence to detect known and unknown threats—specifically when determining an insider threat, account takeover, and privilege abuse or misuse.

Security Information and Event Management (SIEM)

Our vendor-agnostic approach means you can ingest data across your enterprise. We correlate and prioritize alerts from network traffic to web servers to SaaS applications.

User & Entity Behavior Analytics (UEBA)

Using proprietary artificial intelligence and machine learning algorithms we analyze account-based threats. Our UEBA develops baselines in your environment to help identify, detect, analyze, and prioritize anomalous behavior in real-time.
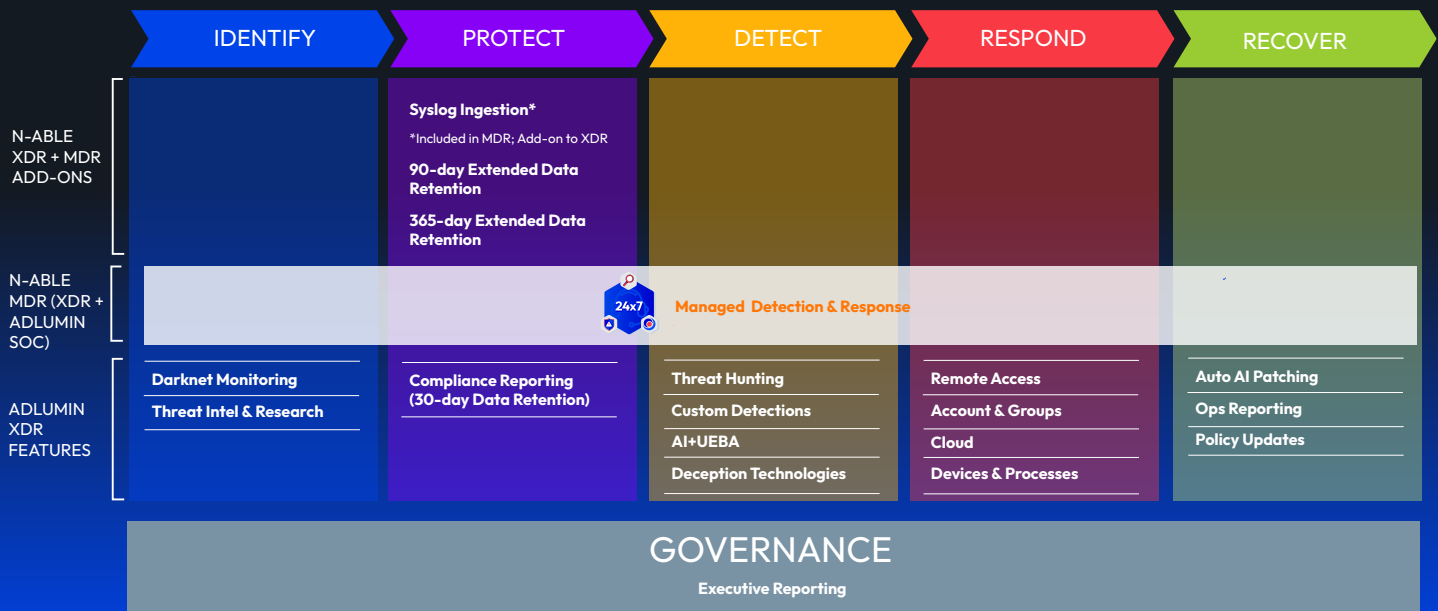

What Makes Us Different?

We won't let your organization get caught in the dark.

N-able, in partnership with Adlumin, provides the premier command center for security operations. Together we stop advanced cyber threats, eliminate vulnerabilities, and take command of sprawling IT Operations with Adlumin's Security Operations Platform. You can manage N-able XDR SaaS product yourself, through a trusted Partner, or engage N-able MDR and the Adlumin team to protect your business 24x7.

The solution offers world-class analytics, compliance reporting, automation and remediation tools, integrated threat intelligence, 24x7 search for leaked accounts on the darknet, on-demand customer support, implementation in 90 minutes, and more.

N-able XDR is a cost effective and attainable solution for small, medium, or large organizations. Customers can monitor and defend their networks locally, in the cloud, and across the globe.

N-able XDR and MDR & the NIST Framework

	IDENTIFY	PROTECT	DETECT	RESPOND	RECOVER
N-ABLE XDR + MDR ADD-ONS		Syslog Ingestion* *Included in MDR; Add-on to XDR **90-day Extended Data Retention** **365-day Extended Data Retention**			
N-ABLE MDR (XDR + ADLUMIN SOC)			24x7 Managed Detection & Response		
ADLUMIN XDR FEATURES	Darknet Monitoring Threat Intel & Research	Compliance Reporting (30-day Data Retention)	Threat Hunting Custom Detections AI+UEBA Deception Technologies	Remote Access Account & Groups Cloud Devices & Processes	Auto AI Patching Ops Reporting Policy Updates

GOVERNANCE
Executive Reporting

Adlumin is the security operations command center that keeps organizations of all sizes secure. Its patented technology and seamless integrations simplify complexity to deliver a feature-rich platform for sophisticated security teams, and transparency and collaboration that empowers smaller organizations, channel resellers and service providers. Adlumin is headquartered in Washington, DC. For more information visit www.adlumin.com.
