Key Features of Adlumin Managed Detection and Response (MDR)

24x7 visibility into your environment

Adlumin Managed Detection and Response (MDR)

Adlumin MDR is Adlumin's Extended Detection and Response (XDR) SaaS product, which includes SIEM, User & Entity Behavior Analytics (UEBA), compliance reporting, and integrated threat intelligence in real-time. All run by Adlumin's 24x7 MDR Team. Adlumin MDR provides the capabilities and power of an enterprise-grade Security Operations Center without the cost of building one. Our experienced analysts enhance your team's capabilities and help you reduce threat detection and response times while gaining complete visibility.

Real-Time Detection and Response
Security analysts review detections and acknowledge them directly in the product.

Achieve Compliance Requirements
Assist with automated compliance reporting (e.g., PCI DSS, NIST, and HIPAA).

Vulnerability Network & Host Scans
Continually vulnerability scans with reports provide a clear view of your network (e.g., outdated software, weak passwords, dangerous open ports, etc.).

Situational Awareness and Reporting
Provide situational awareness and reporting on current cybersecurity posture, incidents, and trends in adversary behavior to appropriate organizations.

Analysis and Recommendations
Get investigative details for confirmed incidents and recommendations on how to protect against future threats.

Darknet Monitoring
Monitors organizational accounts for breaches on the darknet.

Privilege Analysis of Network Accounts, Systems, and Groups
Privilege analysis of every account, system, and group, users know exactly who can access their most sensitive data.

Single Point-of-Contact
All customers have a single point-of-contact for the Adlumin MDR Service.

What makes Adlumin Different?

We won't let your organization get caught in the dark.

Adlumin provides the premier command center for security operations. We stop advanced cyber threats, eliminate vulnerabilities, and take command of sprawling IT Operations with Adlumin's Security Operations Platform. You can manage Adlumin XDR SaaS product yourself, through a trusted Partner, or engage the Adlumin MDR team to protect your business 24x7.

Adlumin offers world-class analytics, compliance reporting, automation and remediation tools, integrated threat intelligence, 24x7 search for leaked accounts on the darknet, on-demand customer support, implementation in 90 minutes, and more.

Adlumin is a cost effective and attainable solution for small, medium, or large organizations. Customers can monitor and defend their networks locally, in the cloud, and across the globe.

Adlumin Security Operations Platform & the NIST Framework

Adlumin Extended Detection and Response (XDR), Adlumin Managed Detection and Response (MDR), and Managed Security Services

IDENTIFY	PROTECT	DETECT	RESPOND	RECOVER
